TWI Designjet Documents library presented here as a courtesy of NOTE If the printer is installed on a MultiRoll feeder accessory, some MultiRoll disassembly is required to gain access to the printer. Instructions for MultiRoll disassembly are listed at the bottom of this document for reference. Tools required Industry standard tool set Ohm meter Parts required part numbers are subject to change If functionality is verified, no additional parts should be replaced. Turn on the printer. Observe if error appears during initialization. If the error appears during initialization continue with step 8. If the printer prompts READY following initialization, open the printer window. Observe if error appears when the window is open. If no error appears during initialization or when the printer window is open, attempt to verify printer functionality. If error appears when window open, continue with the remaining steps. Turn the printer off using the main power switch located on the back of the printer. Remove the DIMM cover plate at back of printer. Remove and reseal each DIMM card. Turn the printer on, and repeat steps 18. If the error has been eliminated, replace the DIMM cover and run several internal prints to verify printer functionality. If the error appears, turn the printer off and disconnect and reconnect the Replace the If error continues after replacing the If fan noise is audible continue with step 17. If the error continues after replacing the NOTE Check the The cable test points should show no continuity, which translates to a very high resistance on the multimeter. Also check fuses F7 and F8 on the Electronics module before powering the printer On with new Emod fuses F7 and F8 should measure about the same resistance when compared to each other. Check both rows of vacuum holes for clogging. Unclog any holes with a straightened paperclip or other appropriate tool.

<http://dhirarchitects.com/images/bread-and-butter-maker-toastmaster-manual.pdf>

NOTE Clogging of the vacuum holes will not induce this error, but may cause premature failure of components due to overheating. Perform a Calibrations Backup service calibration listed below. Run several internal prints to verify printer functionality. Calibrations backup NOTE Printer menu mode must be set to Full to access the Service Tests submenu. To verify, at the Ready prompt, scroll to the PRINTER SETUP icon, and press ENTER. Use the ARROW keys to scroll to the Utilities menu and press ENTER. Select Full if needed and press the BACK key to return to the main menu. Scroll to the Utilities menu, and press ENTER. Simultaneously press the UP and ENTER keys. Use the ARROW keys to scroll to the Service Calibrations menu and press ENTER. In the Service Calibrations menu, scroll to 7 Calibrations Backup and press ENTER. Select Electronics Module repl, and press ENTER. Select Accept to continue the Calibrations Backup. Press ENTER when Calibrations Backup is complete. MultiRoll feeder disassembly Only remove the corresponding side cover of the MultiRoll that requires maintenance. For example, only remove the right side cover of MultiRoll if only the right end cover of the printer requires removal to complete the necessary service. Follow the steps listed below to gain access to the printer to complete the necessary service. NOTE Only ONE CE needs to be dispatched to perform service on a 1000 Series printer attached to a MultiRoll feeder. Removing the MultiRoll feeder left side cover WARNING Turn both the printer and the MultiRoll feeder Off and disconnect them from the power source prior to performing any maintenance. Open the left door of the MultiRoll feeder. Loosen the two screws that secure the left door to the MultiRoll feeder see Figure 1. Figure 1 Screws to remove. Remove the left door. CAUTION Be careful not to break the door when removing it. Remove the two star screws Orange that secure the Front topcover to the MultiRoll feeder see Figure 2.

Figure 2 Two star screws to remove. Remove the MultiRoll feeder top cover. Remove six T20 screws that secure the left Side cover to the MultiRoll feeder from the front see Figure 3. Figure 3 Six screws to remove. Remove the seven T20 screws that secure the left side cover to the MultiRoll feeder from the rear see Figure 4. Figure 4 Seven screws to remove. Remove the left side cover see Figure 5. Figure 5 Removing the left side cover. Removing the MultiRoll feeder right side cover WARNING Turn both the printer and the MultiRoll feeder off and disconnect them from the power source prior to performing any maintenance. Remove the Right door and Front top cover from the MultiRoll feeder follow steps 1 through 5 of the previous section and remove the right door instead of the left. Remove Six T20 screws that secure the right side cover to the MultiRoll feeder from the front see Figure 6. Figure 6 Six screws to remove. Remove nine T20 screws that secure the right side cover to the MultiRoll feeder from the rear see Figure 7. Figure 7 Nine screws to remove. Open

the Rear Top cover see Figure 8. Figure 8 Rear Top cover. Release the cable that is attached to the top of the right side cover see Figure 9. Figure 9 Cable to release. Remove the right side cover see Figure 10. Figure 10 Removing the right side cover. Installation of covers Follow the procedures listed above in reverse order. Please try your search again later.To calculate the overall star rating and percentage breakdown by star, we don't use a simple average. Instead, our system considers things like how recent a review is and if the reviewer bought the item on Amazon. It also analyzes reviews to verify trustworthiness. These snap into a receptacle on the connector, to hold the cable in place, and to let you know you have inserted the cable completely. This replacement cable set lacks these tabs but is otherwise perfectly serviceable.

When replacing the trailing cable, be sure to consult the service manual about how to check that it is getting proper continuity over the cables before powering on the printer. If you have not inserted the cable fully, you will blow a failsafe fuse on the controller otherwise.
